

A 10x10 grid with a yellow background and a dashed black grid. Thick black lines form a 5x5 grid of 25 squares. The top row of squares is labeled with numbers 19, 28, 2, 21, 5, 6, 17, 3, 25. The left column of squares is labeled with numbers 33, 6, 3, 20, 19, 5, 4, 32, 16, 8. Some squares contain numbers: the square at row 20, column 9 contains '9'; the square at row 19, column 7 contains '1'; the square at row 5, column 8 contains '1'.

The image shows a 9x9 grid representing a 3D cube. The grid is divided into 27 smaller cells by thick black lines. The numbers 35, 16, 9, 27, 8, 15, 12, 5, 18, and 18 are placed at the top of each column. The numbers 4, 14, 22, 19, 18, 4, 6, 8, and 5 are placed to the left of each row. The grid is filled with yellow cells. A path of 9 cells is highlighted in black, starting from the top-left cell (row 4, column 35) and ending at the bottom-right cell (row 5, column 18). The path is defined by the following coordinates (row, column): (4, 35), (14, 35), (22, 35), (19, 35), (18, 35), (4, 35), (6, 35), (8, 35), and (5, 18). The number 9 is placed in the center of the grid, specifically in the cell at row 14, column 18.

A 10x10 grid representing a 1000m² plot. The grid is divided into 10 columns and 10 rows. The columns are labeled with numbers: 6, 21, 20, 19, 15, 7, 13, 33, 8. The rows are labeled with numbers: 37, 14, 18, 10, 5, 27, 21, 7, 2, 22. The grid is filled with yellow cells. Some cells are outlined with thick black borders, forming a complex shape. The numbers 1, 9, and 1 are placed in specific cells: '1' is in the cell at row 21, column 3; '9' is in the cell at row 7, column 4; and '1' is in the cell at row 2, column 5.

[illegible]

A 10x10 grid representing a 1000x1000 square divided into 100 smaller squares. The grid is labeled with numbers 1 through 31 along the top and left edges, indicating the size of the squares. The grid is filled with yellow squares, and the numbers 1, 9, and 1 are placed in the center of the grid.
